COLOMBO CENTENNIAL

CENTI-NEWS

Womb to World nearing completion

The Womb to World Project is nearing completion, with the maternity clinic room in Ganemulla set to be handed over in September 2025. The new facility, which includes a consultation room, doctor's washroom, and renovated waiting area, will serve 80–140 mothers monthly and bring lasting benefits to a community of nearly 10,000 people.

● 1st General Meeting of August

On August 13th, the Rotary Club of Colombo Centennial held its 2nd General Meeting, featuring guest speaker Rtn. Ian Iddamalgoda – Past Assistant Governor, Past President, and District Secretary Elect. He shared valuable insights on “Deep Dive: Making the Most of Rotary Global Grants”.

● Lead25 Program

Our members Mathan and Gulnara proudly represented us at the Lead25 program in India, a premier leadership development experience that brought together emerging leaders from across the region.

The program focused on building essential skills in collaboration, innovation, and cross-cultural understanding. Through interactive sessions, networking, and practical exercises, participants were challenged to think bigger and lead with purpose.

Mathan and Gulnara returned with fresh perspectives, strengthened leadership capabilities, and valuable connections—ready to apply what they learned to inspire and empower within our club and community.

● 2nd General Meeting of August

On 27th August at Tri-Zen, we successfully hosted an awareness program on Colon Cancer – Prevention Through Lifestyle and Early Detection with Prof. Ishan de Zoysa, Professor in Surgery, University of Colombo. It was an eye-opening evening where Prof. de Zoysa highlighted the importance of lifestyle changes and early detection in saving lives. The event drew strong participation, meaningful discussions, and concluded with a fellowship dinner. Members from Kandy Metropolitan joined the meeting as well.

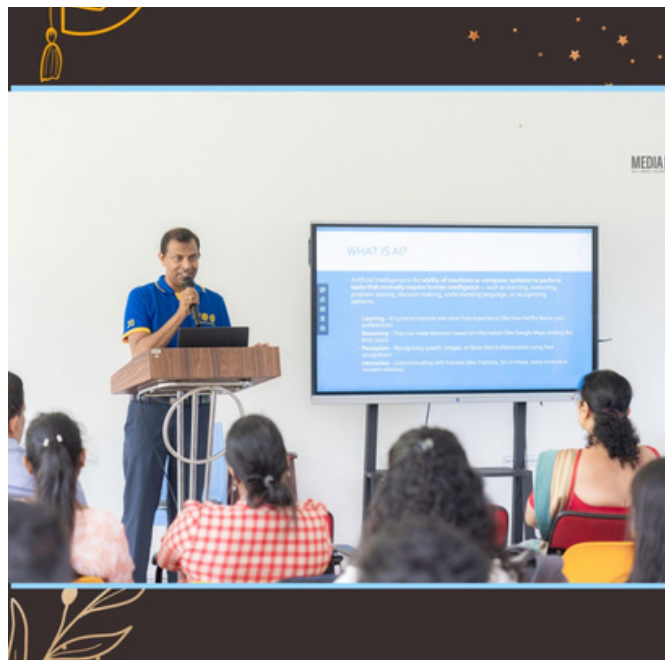

● Campus To carrier session fot Sri Lanka Technology Campus

Students of Sri Lanka Technology Campus (SLTC) recently benefited from an inspiring guest lecture by President Shervon Fernandopulle on the theme “Campus to Career – Navigating the AI-Transformed Job Market.”

He highlighted how AI is reshaping industries, stressing the need for graduates to build skills in creativity, critical thinking, adaptability, and continuous learning. Rather than seeing AI as a threat, he urged students to embrace it as a tool to enhance human potential and unlock new opportunities.

His practical insights and roadmap for success left students motivated to prepare themselves to thrive in the rapidly changing job market.

Rotary Club of Colombo Centennial

Last month, the Rotary Club of Colombo Centennial took part in several installation ceremonies, proudly showing our support for the new presidents and building stronger bonds with fellow clubs.
